

If students could look back on their CCA memories . . .

During Fall 2009, several middle and high school students were asked what might be their memories of CCA after they graduate. Their responses:

"I have been at CCA since 4th grade. One of my favorite teachers was Miss Burr. She was the best 4th grade teacher! I miss her though; she works in Texas. But I will always remember her and not forget her, because after all, she was my first friend."

"I will remember the closeness I had with my class because we all bonded together and wanted to help each other. No one bullied or picked on as much as in the public school. I will also remember learning about who God is and gaining my spiritual foundation."

"CCA has impacted my life in many different ways because I have grown as a person and as a Christian. I have made so many great friends. What I love most about CCA is that even though the people are different here, we can all connect because we all know the Lord!!! We can all help each other in our walk with Christ."

"CCA has really made me stronger. I remember the day when I came here in 3rd grade. It was such a great time. I love that school."

"I'd remember all the fun assemblies in the big gym. . . meeting friends in first grade. . . changed my life from a public school to this amazing all-denomination school. I remember the chapels every Tuesday. . . playing on the playground with friends. . . "

"I'd remember gym and the field trips we went on. . . the fun times with friends in classes . . ."

"I'd remember the day I shadowed at CCA. It was a very warm and inviting feel to it. It made you feel like you were welcomed. Also, I could tell that God was there through the action of teachers and students."

"The people at CCA were kind and loving and accepting. I would remember Darien Lake [Science Day] in Middle School."

"I would remember all of my friends and the teachers who taught me well."

"I remember being by myself all the time with no friends until one day I prayed that I could make friends and over 5 people came to me without friends. I then realized I had friends all along and the Lord showed me that and to this day I still read Proverb 2:1-7 which tells me what to do to work for the future. And now I am very diligent because I went to CCA."

"CCA has really impacted me spiritually. In first grade, my teacher noticed that I wasn't working to my full potential. So she would take time during recess and consult with me about my work. I thought that she was mean, because I couldn't play. But now I look back and I see that it was very encouraging. Because of her, I can be the student I am today."

“I’d remember all the amazing, Godly chapels I’ve heard. From God’s mercies to miracles and teaching I heard every week. At CCA, I would remember that God was taught and how much better it was than at the public school that I came from.”

“CCA broke me out of my shell and helped me to make my faith real, and brought me to friends who I hope to keep for the rest of my life.”

“I’d remember the friendships and extracurricular activities, like Mock Trial and Journalism.”

“I’d remember the views the school helped me to develop about the world, how I could conduct myself and the Christian worldview that I have obtained.”

“I’d remember the Gettysburg field trip in 5th grade.”
